

# How to Effectively Read a Textbook

## Table of Contents (ToC)

The ToC will help situate you and gives you perspective on what you're reading.

## Preview and Preread

Before diving in, take a look at the chapter's title, headings, sub-headings, visuals, and captions.

## Chapter Summary Materials

Key concepts and summaries are usually what you need to know by the end of the chapter.

## Take Notes

Watch out for bolded fonts, definitions, and jot down any questions that you may have.

## Review

Compare your lecture notes to your personal notes and even your friends' notes. Ask yourself: "Have my questions been answered, or do I need some more help?"
