

# Interacting with Profs

## Use office hours

Many students never attend office hours. Profs wait alone or assume everyone understands the class.

## Don't be afraid

You have valuable thoughts and you're at university to learn. Ask questions early and often.

## Have something to say

Your prof wants you to challenge ideas and be engaged.

## Come prepared

You will gain more if you have specific questions ready.

## Clarification can be easy

Often your questions don't take long to sort out. Just go talk to your profs early.
